Following is the list of available positions (full time or internship) in Machine Intelligence Center of Lenovo. If interested, please contact Jun Luo at jluo1@lenovo.com

Deep Learning Research Scientist

Responsibilities:
Candidate will be doing research on deep learning or automated machine learning to solve challenging real-life industry problems. The applications will focus automated algorithm design, image recognition, text understanding, speech recognition, dialogue system and other related applications.

Qualifications:
- Master degree in computer science or related fields and with 2+ years working experience or Ph.D. degree in computer science or related fields.
- Expertise in deep learning model, machine learning algorithm.
- Expert knowledge of data structures and algorithms.
- Strong programming skills in one or more in the following: C++, Python, Java.
- Familiar with at least one deep learning framework, e.g. Tensorflow, MXNet, Caffe, etc.
- Familiar with automated algorithm design will be a plus

Location: Hong Kong/Shen Zhen
