LEVI STRAUSS & CO.

Information Technology Leadership Program

ITLP

ITLP puts IT careers on the fast track by combining Levi Strauss & Co.'s leadership development with the challenge of rotational job assignments. ITLP develops leaders with strong technical and project management skills who serve as the pipeline for IT leadership roles across Levi Strauss & Co.

Program Summary

- Four six-month assignments in one of Levi Strauss & Co.'s major business units, including at least one internationally

- On-the-job training from Levi Strauss & Co.'s brightest minds on a variety of new technologies, plus retail, wholesale and apparel industry training

- Rigorous in-class coursework in advanced information technology concepts, finance, leadership and business

- An extensive global network of peers

- Exposure to senior executive leaders through formal and informal meetings, roundtables and discussions

Candidate Criteria

- Bachelor's degree in computer science, information systems or computer engineering preferred — business degree or technical field may be applicable

- Passion and aptitude for Technology and Leadership

- Solid analytical skills and sharp business acumen with past relevant work experience

- Geographic mobility

- For U.S. ITLP candidates only: unrestricted work authorization in the U.S.* through formal and informal meetings, roundtables and discussions

What Is In It For You?

- Enable you to make a measurable impact on the way Levi Strauss & Co. does business

- Expose you to how senior level IT and business leaders operate

- Help you develop personally and professionally through mentoring and coaching

- Accelerate your development of technical, business and leadership skills

- Expand your global mindset by working and training with colleagues from around the world

- Provide you the opportunity to experience three different IT jobs in less than two years

ALL I NEED IS ALL I GOT.

TOUGH AS YOUR SPIRIT.
